Priority Number(s): CH19800001062 19800208
IPC Classification: A61F1/00 ; A61F1/03
EC Classification: A61F2/34
Equivalents: ☐ CH642840

Abstract

Surgical implant for fixation in bone, in which fastening means in the form of peripheral protuberances (3) which have interruptions at intervals, e.g. sawtooth-like interruptions, are provided on the outer wall. The protuberances are, for example, threaded tracks. The implant is suitable, for example, as an artificial acetabulum.
